

Computing

Well, it's certainly been a time for our technology skills to be put to the test! The children have, yet again, demonstrated their resilience when learning new skills in computing. Year 1 and 2 have been using technology to show how creative they can be; from using painting software to create artwork, to using an online platform to create music! Further up the school, in Key Stage 2, the children have been using a complex formula to plan a party on a budget; learning how to use repetition in code to draw shapes; and exploring how computers use databases to store information.

Item	Weight in grams	Price	Stock (start of week)	Stock (end of week)	Total stock sold
Apricots	500	£2.50	20	10	10
