

Design and Technology

This half term in DT, the children have been getting very creative at home. There are some great engineering, textile and some fabulous (and healthy!) cooking skills being demonstrated. In Reception, there were some super scrumptious, superhero pancakes that were made. The cooking didn't stop there; in Year 1, the pupils planned their own recipe and method for creating their own healthy pizza - the fruit ones looked positively delicious! Heading up into Year 3, the children were experimenting with different stitches and how to use them to create their own money containers. The fun doesn't stop there! Our engineers in Year 4 have been designing their own bridges; the children have spent the past half term researching and developing their understanding of how bridges are designed - especially how they stay standing! It's great to see the children's understanding of the world around them developing, even when remote learning.
